

VEVAN O NARAIN

+91-9811311028 | vevanonarain@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

Third-year B.Tech CSE (AI/ML) student at VIT Vellore (9.44 GPA) with strong problem-solving skills and a solid foundation in data structures, algorithms, and computer science fundamentals. Experienced in building production-grade software systems, from CRDT-based collaborative editors to hybrid retrieval and machine learning applications.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, C++, SQL
- **Core Concepts:** Data Structures & Algorithms, Operating Systems, DBMS, OOPs
- **AI/ML:** Scikit-learn, TensorFlow, PyTorch, Sentence Transformers, ChromaDB, RAG
- **Web Development:** React.js, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, Redis
- **Developer Tools:** Git, GitHub, Docker, VS Code, Jupyter Notebook, Linux

PROJECTS

Vync - Real-Time Collaborative Editor [*React, Node.js, Socket.IO, Yjs, PostgreSQL, Redis, Docker*] GitHub

- Developed a Google Docs-style collaborative code editor using CRDTs (Yjs) to enable low-latency concurrent editing with conflict-free synchronization across distributed clients.
- Engineered conflict-free state reconciliation ensuring consistency across concurrent edits without merge conflicts.
- Sandboxed multi-language code execution in Docker containers with CPU and memory limits for secure, isolated execution.

10Kwery - SEC Filing RAG System [*Python, ChromaDB, Sentence Transformers, BM25, Groq, BS4*] GitHub

- Built an end-to-end Retrieval-Augmented Generation (RAG) system for querying SEC 10-K/10-Q filings, with citation-grounded answers and explicit refusal handling for out-of-corpus queries.
- Engineered a four-channel hybrid retrieval pipeline combining dense retrieval, BM25, table-specific retrieval, Reciprocal Rank Fusion (RRF), and windowed cross-encoder reranking with type-balanced final selection.
- Developed table-aware, section-aware document processing with token-overlap chunking and metadata filtering, achieving 0.900 MRR, 94% Hit@5, and 100% citation validity on an 18-question evaluation set.

Plant Leaf Disease Detection [*Python, TensorFlow, Keras, ResNet50, Streamlit, Scikit-learn*] GitHub

- Fine-tuned ResNet50 using transfer learning on a dataset of over 50,000 plant leaf images, achieving 98.75% accuracy across 38 disease classes.
- Deployed a Streamlit application for real-time image upload and disease classification with prediction confidence scores.

Real-Time Emotion Detector [*Python, TensorFlow/Keras, OpenCV, CNN, NumPy*] GitHub

- Built a real-time facial emotion recognition system using OpenCV and a CNN trained on the FER-2013 dataset containing over 30,000 facial images.
- Classified seven facial emotions from live webcam input and applied image preprocessing and data augmentation to improve robustness across varying lighting and pose conditions.

EDUCATION

• **B.Tech in Computer Science and Engineering (AI & ML Specialization)**

Vellore Institute of Technology, Vellore

Cumulative GPA: 9.44 | Expected Graduation: May, 2028

• **Senior Secondary (Class XII)** — Modern School Barakhamba Road, CBSE Board

Percentage: 90.2% (PCM with CS) | Completed: May, 2024

• **Secondary (Class X)** — Modern School Barakhamba Road, CBSE Board

Percentage: 96% | Completed: May, 2022

CERTIFICATIONS & ACHIEVEMENTS

- **Machine Learning A-Z** by SuperDataScience Team
- **The MERN Fullstack Guide** by Maximilian Schwarzmüller and Manuel Lorenz
- **Oracle Cloud Infrastructure Generative AI Professional** — Oracle (**Score Report**)
- Solved 200+ problems on LeetCode, strengthening problem-solving skills and proficiency in data structures and algorithms.
